BRITISH LEARNING ACADEMY

ENGLISH AND LIFE SKILLS COURSES

ENGLISH AND ARTIFICIAL INTELLIGENCE

OUR COURSE

AI is Happening - Do Not Let Fear Hold You Back

Artificial Intelligence is shaping the future, but for many young learners it feels unknown and intimidating. At BLA, we make AI accessible and practical: students use it to boost their English, spark creativity, and build confidence and problem-solving. By the end of the course, AI feels less like a mystery — and more like a tool they know how to use.

Join the 50% of Returning Students

In 2025, half of our students returned for another year of English & AI. That's not just a statistic — it's proof that the course works. Families, teachers, and agents see real progress in English and transferable life skills, which is why they trust us year after year.

A Course for Accelerated Self-Improvement

This isn't just about learning in class — it's about learning how to keep learning. We give students the tools to continue improving their English and AI skills long after the course ends. They leave with stronger communication, sharper thinking, and the motivation to push themselves further.

YOUR JOURNEY

Expect an International, Vibrant Classroom

Each summer we welcome students from over 10 nationalities, creating a mix of cultures and perspectives that makes learning richer. Everyone comes with one goal: to improve their English while discovering how AI can shape their future. You'll join likeminded learners eager to explore technology and practise English. Alongside motivated peers who value teamwork and fun, you'll build real skills and lasting friendships.

Your Day to Day

Mornings focus on English and AI, two afternoons on AI projects, and evenings on sports, games, and cultural activities. But the learning doesn't stop when class ends — you'll apply your new skills across the whole BLA experience. Each moment on campus becomes a chance to practise, improve, and grow in confidence.

One Week Sample Timetable

NEXT STEPS

Requirements

This course is open to students with a minimum English level of B1 (intermediate) to ensure they can fully participate in lessons and projects. More importantly, we're looking for learners with curiosity and an interest in their future — young people ready to explore how English and Artificial Intelligence can open new opportunities in study, work, and life.
